TECH STACK

- Java
- Scala
- Spring Security
- Spark
- Spring Data
- Quantexa
- MySQL
- Docker
- REST
- JUnit
- TypeScript
- React
- Shell scripting

FAMILIAR SOFTWARE

- Windows
- Postman
- Linux
- Jaspersoft Studio
- Git
- Jenkins
- Intellij IDEA
- Eclipse IDE
- VS Code

ABOUT ME

I am a full-stack developer and data engineer focused on building reliable, high-quality solutions. My skills include **Spring, React, SQL, Scala, Spark**, and many other technologies. I ensure high code quality by following best software development practices, including **test-driven development (TDD)**, and by using tools such as **JUnit, Mockito, and Selenium**.

In addition, I have experience working with containers and understand continuous integration and delivery using tools like **Jenkins**. I also apply my knowledge by developing my own larger project focused on dynamic creation and configuration of applications for restaurant clients - **HungryScan**.

PROJECTS

I summarize all my work here: **www.maciejakmateusz.pl**

EXPERIENCE

Data engineer - Quantexa   2025/05 - current

ING Hubs Poland

- developing new features in the ETL process
- maintenance and ongoing bug fixing
- performing application upgrade processes
- running Spark jobs on the cluster
- writing integration and unit tests
- daily scrum, planning sessions, retrospectives, and refinements
- creating new user stories for improvement ideas or discovered bugs

Java Developer   2023-2025

Eq System - Katowice

- hybrid teamwork in SCRUM team
- PMS department - payroll and HR solutions
- active participation in retrospectives, planning, and refinements
- independently selecting tasks from the backlog
- writing functional enhancements for a complex system of payroll component algorithms
- resolving errors and fixing defects reported by testers and clients
- writing reports in Jaspersoft Studio
- utilizing an internal training platform to continuously improve skills

EDUCATION

React + Redux
CodersLab
10/2023 - 01/2024

Java Developer
CodersLab
01/2023 - 09/2023

Design of technological processes
EMT-Systems/TUV Nord
10/2019

Programming and operation of CNC machines
EMT-Systems/TUV Nord
10/2018

Highschool
Zespół szkół nr 3 w Jastrzębiu-Zdroju (School No. 3 in Jastrzębie-Zdrój)
01/2023 - 09/2023

LANGUAGES

- **Polish:** native
- **English:** B2
- **Dutch:** B1

DRIVING LICENCE

- Category: B

CNC Programmer/Technologist   2018-2023

Boal Systemen B.V. - Netherlands

- operating CNC machines
- writing programs for CNC machines (CAM or ISO)
- printing orders and drawings from the system
- rebuilding machines for specific needs
- writing programs based on technical drawings
- selection of appropriate tools for machining
- reviewing and optimizing programs as needed
- checking products with drawings to check tolerances
- registration of completed orders in the system

Production worker - glass recycling   2015 - 2017

Maltha Glas B.V. - Netherlands

- checking whether large stones end up in the crusher
- maintaining cleanliness (sometimes visibility was only a few meters)
- ensuring that both shakers do not become clogged with waste
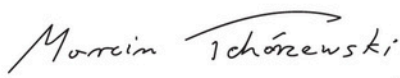

Dyplom ukończenia kursu IT

Java Developer

Mateusz Maciejak

Kurs obejmował 213 godzin wykładów oraz zajęć praktycznych z wykładowcą.

Zakres tematyczny: podstawy Java, programowanie OOP, bazy danych SQL, Servlety, JSP, podstawy JavaScript, Spring, Hibernate, Spring Boot, Rest API, projekt końcowy.

Marcin Tchórzewski
Coders Lab CEO

Jacek Tchórzewski Head
of Education

10 września 2023

Certyfikat ukończenia kursu

JavaScript Specialist: React + Redux

Mateusz Maciejak

Kurs obejmował 36 godzin wykładów oraz zajęć praktycznych z wykładowcą.

Zakres tematyczny: zaawansowany JavaScript, projekt SPA (single-page-application) z wykorzystaniem React Router, biblioteka React Redux, REST API.
